

At Richland Place Rehabing Our Rehab Gets you "Up and About"

Compassionate, state-of-the-art and cost effective rehabilitative services for our residents and the local community have been the hallmarks of the Richland Place Health Center. At the same time we have been able to create a great work environment that facilitates the recruitment and retention of competent staff.

Because of our success and changing demographics, more space is needed to enable Richland Place to continue to carry out this mission going forward. This will allow us to incorporate new technology and expand both quality of care and the number of people served.

Within the footprint of our *present campus*, the following proposal doubles our space and thereby positions us to increase our revenue stream and allows us keep pace with the increasing quantity and quality demands made on Richland Place rehabilitative services.
